

As a study guide the students would go to the following website <http://bovine.unl.edu>

All they have to do is select desired bone or muscle from the list below and click on it and it will show a nice photo of each bone and muscle. Click on muscles, bones, skeleton, cross section. Click on the colored photo bones and muscles and it will given the members the correct names.

The list they need to know is:

Muscles

Longissimus dorsi
Infraspinatus
Spinalis dorsi
Psoas major
Gluteus medius
Biceps femoris
Semitendinosus
Semimembranosus

Bones

Scapula
Humerus
Femur
Thoracic vertebrae
lumbar vertebrae
Ribs
